

Dayton's Serving Our Community *March* 2026

Dayton's Update

As Dayton's Heating & Cooling has grown, it became clear that keeping plumbing under a separate name created unnecessary confusion.

Different logos. Different branding. Different recognition.

Even though it was the same team, same standards, same commitment.

By consolidating everything under Dayton's Heating, Cooling & Plumbing, we're making it simpler for our customers.

One name.

One logo.

One trusted company.

This change allows us to strengthen brand recognition, streamline marketing, and make it crystal clear who to call for total home comfort.

Same great people. Same quality service.

Just one powerful brand moving forward.

Around The Shop

When there's work to be done, Johnce doesn't just point the way, he grabs a shovel. When the street department needed access to a water line break under the road, he jumped in to help clear the snow and get the job moving.

Big shoutout to our City Street Department for their hard work out there in the cold keeping everything running smoothly for our community. We're proud to work alongside people who care just as much as we do.

Our Office Manager and Marketing Intern stopped by Michael's House to deliver Valentines and brighten a few smiles. Our team made some special Valentines for the residents to help make the day a little sweeter.

A big thank you to Bailey's Flowers & Gifts for the beautiful flowers that helped us share the love. We're so grateful for the opportunity to give back to our community! It's the little things that mean the most.

TECH TIP

EMPLOYEE OF THE MONTH

JAMES ARTHUR

We're proud to recognize James as this month's Employee of the Month! James earned this honor for his perfect attendance and his consistently positive, can-do attitude. Day in and day out, he shows up ready to work, ready to help, and ready to tackle whatever comes his way. His reliability makes a huge difference for our team and our customers.

Whether he's on a job site or supporting a teammate, James brings professionalism, dedication, and a strong work ethic to everything he does. We're grateful to have him representing our plumbing department and living out the values that matter most to us.

Congratulations, James and thank you for all that you do!

Dayton's Cookbook

SHAMROCK SHAKE

Ingredients

- 2 cups vanilla ice cream
- 3/4 cup whole milk
- 10 drops green food coloring
- 1/4 teaspoon mint extract
- whipped cream, sprinkles and maraschino cherries for serving

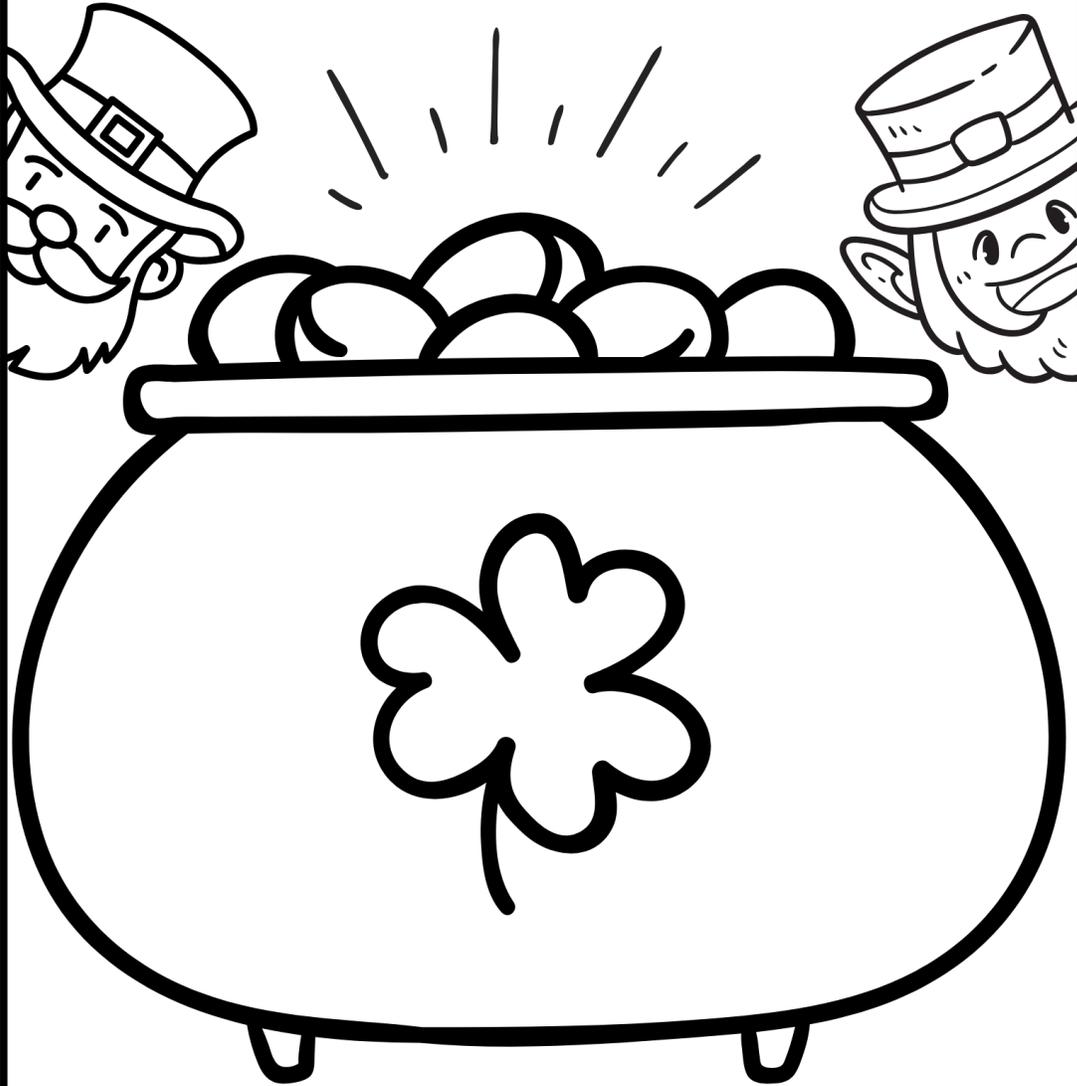

Instructions

- Place the ice cream, milk, food coloring and mint extract in a blender.
- Blend until smooth.
- Pour into two glasses. Top with whipped cream, sprinkles and cherries, then serve

Happy
St. Patrick's
Day

- Notes: It's best to use mint extract for this recipe rather than the more common peppermint extract.
- Use whole milk in this shake for the creamiest result.
- Use 10 drops of green food coloring to get a very vibrant green color. If you're using a gel food coloring rather than the liquid, you'll need 3-4 drops to achieve the same result. If your green coloring is a little too blue, try adding a couple of drops of yellow food coloring.

HAPPY ST. PATRICK'S DAY!

Coloring Contest Rules

1. Color the page
2. Fill out bottom info
3. Submit your entry one of three ways :
 - a. Email to Office@daytonshvac.com
 - b. Mail to 1304 9th St, Bedford, IN, 47421
 - c. Bring into our office
4. Winner will receive \$25 gift card via mail

Receipt Deadline:
April 1, 2026 **

*First & Last Name: _____

Required fields*

*Home/ Mailing
Address:

Street Address City State Zip Code

Breathe Easier at Home

Indoor Air Quality (IAQ) Solutions That Work for You

The air inside your home can be 2–5 times more polluted than outdoor air. From allergens and odors to bacteria and viruses, Indoor Air Quality products help create a cleaner, healthier, and more comfortable home for you and your family—year-round.

Is the Air in Your Home Really Clean?

Check all that apply:

- Allergy symptoms that never seem to go away
- Pet, cooking, or musty odors lingering in the air
- Dust showing up again right after you clean
- Past mold, mildew, or moisture concerns
- Concerned about germs circulating through your HVAC system

☛ If you checked one or more, an IAQ solution could make a noticeable difference.

iWave® Air Purification
Whole-home air purification
that works silently in the
background.

How it works: The iWave system installs directly in your HVAC system and uses ionization technology to reduce contaminants as air circulates throughout your home.

Benefits:

- Reduces bacteria, viruses, mold spores, and allergens
- Helps eliminate odors from pets, cooking, and smoke
- Little to no replacement parts or ongoing maintenance
- Safe for people, pets, and plants
- Perfect for: Families, allergy sufferers, pet owners, and anyone wanting cleaner air without added upkeep.

Ask your service tech about Indoor Air Quality solutions and find out what's best for your home!
